

Resource Geology Special Issue No. 22, 139p., 2010

**“EXPLORATION AND DISCOVERY OF
BASE- AND PRECIOUS-METAL DEPOSITS
IN THE CIRCUM-PACIFIC REGION
- A 2010 PERSPECTIVE”**

by
RICHARD. H. SILLITOE

NOW ON SALE !

1. The exploration and discovery histories of 31 major base- and precious-metal deposits around the Pacific Rim during the last decade are described.
2. The roles of different geological, geochemical and geophysical methods as well as other factors in both the discovery process and post-discovery exploration are appraised.
3. A straightforward strategy for future discovery of base- and precious-metal deposits in the region is revealed on the basis of the 101 case histories in 40-year period combined.
4. Must book for the new resource super-cycle age in 21st century.

CONTENTS

Synopsis / Introduction
I. Porphyry Copper-Molybdenum Deposits
II. Porphyry Copper-Gold / Gold Deposits
III. Iron Oxide-Copper-Gold Deposit
IV. Pluton-Related Gold Deposits
V. Skarn Gold Deposit
VI. Sediment-Hosted Gold Deposit
VII. Breccia- and Sediment-Hosted Gold- Silver + Zinc-Lead / Copper Deposits
VIII. High-Sulphidation Epithermal Gold ± Silver ± Copper Deposits
IX. Low- And Intermediate-Sulphidation Epithermal Gold-Silver / Silver Deposits
X. Volcanogenic Massive Sulphide Gold Deposit
XI. General Conclusions
XII. Forty-Year Discovery Trends
XIII. Future Exploration Strategy
